Graphical Guidelines 2009

This manual was created to help you use the Orc Software visual identity in the correct way. It gives you guidelines on how to use the logo and name as well as the Orc solution names and tagline. It also covers the use of colors, language and trademarks.

Introduction

The Orc Brand

The Orc visual identity is the foundation upon which the Orc brand is built, and is the icon by which we are recognized and remembered. It is most powerful when applied congruently and when integrated throughout all levels of communication. It is therefore critical that the visual identity is always presented correctly - whether used in printed material or on screen.

This document is designed to help you use the Orc visual identity in the correct way. It provides detailed guidelines for its use and identifies possible errors to avoid. The long-term effectiveness of the visual identity depends on ensuring the guidelines are adhered to. If you need further clarification or assistance with any matter relating to the identity please contact our Marketing Group.
